

Federal dollars bring Solar Armageddon

Stearns County, MN -

WEBNOTE- See attachment below AND your local City (and County) COMPREHENSIVE PLANS which will carve up your beloved City with a huge mass of TRAILS to schools, Parks, Public Recreation facilities and LOW INCOME HOUSING etc etc,

BY RON BRANTSNER:

These overpaid bureaucrats decided to hand their responsibilities over to another non-elected body. Recently the Commissioners gave Environmental Services authorization and total control over all new construction of solar

fields. Building these solar farms, up to 1 megawatt, comes with no oversight and no accountability. This became a blank check for an environmental Armageddon on prime farm land.

The requirement for County Commissioners to receive notice on new construction of solar fields, will no longer exist and authorization will no longer be required to build. Their rich productive farmland gets leased, thus is pulled out of production for a mere thirty pieces of silver. This will cause food costs

to rise, and the global market will grow fat as it capitalizes on our dwindling food supply. With a sustainable food supply no longer available, importing food will become the norm to feed Minnesota families.

The import of beef and fuel are on the rise as farmers replace soil for solar.

A small sacrifice for staying warm for those who are hungry and living mouth to

mouth. Where are the voices and outrage by the people for the citizens of

Stearns County? That's right, they sold you out again for a costly program with

little positive results, aka, the Green New Deal.

This follows the Biden pattern of closing down the oil fields in North Dakota,

and Walz closing the Coal-fired power plant in Becker. Minnesota will be

importing energy at a higher cost to stay warm. Commissioners in Stearns County are selling us out for the Green New Deal, that has no track record for success, while Minnesota's agriculture and scenic landscape is in peril. Take a trip down memory lane. Stearns County Commissioners, along with other stakeholders in St Cloud, relinquished, thus giving up their authority to Lutheran Social Services with the refugee resettlement program. As a federal contractor, LSS took complete control over them. That turned out to be a costly disaster for Stearns County, especially St Cloud State University, and the public school system as it continues to decline in enrollment. The County is in slow decay, at every level, from education to crime. This third world refugee program, and forced integration, has turned neighbor against neighbor. Stearns County is becoming a cess-pool for low living conditions. Waite Park and St. Cloud, now rank in the top 10 for crime in Minnesota. To top it off, the same politicians who have been running the Clown show for decades, keep getting re-elected. The definition of insanity is repeating the same thing over and over and expecting a different result. Welcome to Stearns County. Now, look to investigate Environmental services. They have a voice in our lakes and aquatic species. What's next, the annexation of water sports and fishing? You will find out your liberties are eroding faster than Bidens popularity.

Control the food and you control the people.
